**Subject:** Re: Tentative WSA Fiber Symposium

To the extent that you refer to lung diseases the emphasis seems to be on cancer, what about Interstitial lung fibrosis?

**Subject:** FYI: Tentative WSA Fiber Symposium

FYI - Attached is an updated project sheet for a PM Science Mini-Symposia. This first symposium will focus on improving our understanding of Fiber Induced Lung Toxicity. Also attached are the tentative speaker list, agenda,

and topics. Topic titles to be finalized in the next two weeks.

We have patterned our series after the experiences gained from the successful PM RD&E Symposia. As this will be the first of our series, with

others to follow ... improving our understanding in such topics as smoke constituents, biomarkers and other topics of interest ... we are open to any

suggestions for improvement. Thanks - Robbie
